RESEARCH

Diabetic foot ulcer 、 self-care behavior

TEACHING

Physical Assessment, Adult Nursing, Adult
Nursing Practice, Fundamentals of Nursing
Practice

RESEARCH PROEJECT

- The effectiveness of a short message-based customized standardized education program in promoting wound healing and quality of life of patients with diabetic foot ulcers (NSTC 112-2314-B-182-028, 2023-2024)
- The effectiveness of a motivational interview based discharge planning for patients with diabetic foot ulcers: Randomized control trial (Con't) (CMRPD1L0361, 2021-2022)
- The effectiveness of a motivational interview based discharge planning for patients with diabetic foot ulcers: Randomized control trial (MOST 109-2314-B-182-053, 2020-2021)
- The post-discharge diabetic foot ulcer self-management behaviors : predictors and evaluation of a motivational interviewing-based intervention (MOST 106-2314-B-182-005, 2017-2018)

- The effect of empowerment strategy for the prevention of diabetic foot ulcer and amputation on patients with history of diabetic foot ulcers (MOST 104-2314-B-182 -003, 2015-2016)
- Factors related to the diabetic foot ulcer treatment-seeking behavior delay (CMRPD1E0151, 2015-2016)
- The foot self-care behavior model in patients with diabetic peripheral sensory neuropathy (CMRPD1A0031, 2011)
