

# **Subcultural Health Care Lab**

**Leader: Prof. Yun-Fang Tsai**

## **Mission & Aim**

Subcultural groups are vulnerable to health-care disparities because they often cannot access care resources and are often misunderstood by the majority ethnic group. Therefore, Prof. Tsai established the Subcultural Health Care Laboratory at Chang Gung University to highlight the needs of subcultural populations. It is hoped that through the efforts of this laboratory, the medical care system and medical professionals will pay attention to the subcultural groups, so as to provide appropriate health care and promote their physical and mental health. At the same time, it is hoped that general population's prejudice and misunderstanding about subcultural groups will be broken, so that these vulnerable groups and their relatives can live with well-being in societies.

## **Research Focus**

The Subcultural Health Care Laboratory has focused on AIDS care, mental illness, Aboriginal health, and geriatric care.
